

In compliance with legal, bylaws and securities market requirements, General Shopping Brasil S/A submits to you its annual report and financial statements for the year ended December 31, 2014.

#### MANAGEMENT COMMENTS

With the end of fiscal year 2014, the Company's management is pleased to submit its operating and financial reports for 2014 and 4Q14, commented below.

The Company reported variation in proprietary GLA (Gross Leasable Area), reducing by 7.2% compared with the end of 2013 due to the sale of a 50% stake in Santana Parque Shopping and Top Center in its entirety in 3Q14, as already announced.

Occupancy rates reported an improvement from 96.5% in 2013 to 97.0% in 2014.

Evaluating organic performance using the same areas concept, the Company recorded growth of Same Area Rentals of 9.7% in 4Q14 in comparison to 4Q13 and 10.9% in 2014 compared with 2013. There was also a growth in Same Area Sales of 11.4% in 4Q14 compared with 4Q13 and 11.9% for the full year.

In 2014, total gross revenue reported a year-on-year increase of 13.8% to R\$ 275.3 million (this consisting of an 8.8% growth in revenues from rentals and 29.0% from services). The net revenue item also posted the same 13.8% growth to R\$ 251.1 million with a corresponding increase of 13.1% in NOI (reaching R\$ 218.4 million) and 14.9% in Adjusted EBITDA (R\$ 176.9 million). During the same fiscal year, costs rose 15.7%, driven largely by "third party services", followed by "personnel". General and administrative expenses increased by 15.7%, the main variation being in the item "third party services". As to the Financial Result, the Company registered a negative net result of (R\$ 308.1) million in 2014 – (R\$ 128.2) million being the net FX (foreign exchange) currency effect of which (R\$ 136.3) million is the "non cash" currency translation effect. By comparison, the net financial result was (R\$ 251.5) million in 2013. The Company's net adjusted result was a negative R\$ 170.0 million in 2014 compared to a negative R\$ 129.9 million in 2013.

Further details on results and other information can be found in the following reports and corresponding financial statements.

Once again, we would like to thank our employees, storeowners, customers and visitors for their contribution to the Company's activities.

Alessandro Poli Veronezi, Investor Relations Officer

#### **COMPANY OVERVIEW**

General Shopping Brasil is one of the main Brazilian companies focused on owning and managing various kinds of shopping centers. We have 250,003 m<sup>2</sup> of gross leasable area in 16 shopping centers, with an average ownership interest of 76.9% beyond provide complementary services for the operations.

We believe our success is based on market understanding and on the success of the retail operations in our shopping centers.

Our goal is to maximize the profitability of the Company through their leasing revenues arising better tenants' performance and the supply of complementary services on one side, and trading interests on the other. Based on marketing and location surveys, our strategy is:

- Real estate investment in ownership interests in shopping centers, either by developing greenfields, acquiring from third parties or increasing ownership interests in our current portfolio;
- Negotiation of interests with the third parties of Company's assets;
- Managing these shopping centers in an optimal way through our competences;
- Providing services that are complementary to shopping center operation;
- Developing new types of shopping centers in the Brazilian market, as well as mixed-use projects that create positive synergy with shopping center performance.

#### **DESCRIPTION OF BUSINESS AND INVESTMENTS**

Different from our competitors, we work in the shopping center market in a manner that is oriented toward the retail market. Our main focus is retail tenants who serve the class B and C consumption classes.

Our activities are (i) planning and managing shopping centers; (ii) leasing commercial space (stores); (iii) leasing advertising and promotional space (merchandising); (iv) managing shopping center parking lots; (v) planning and leasing of electrical and water supply equipment at the developments. (See description of revenue in economic and financial performance).

#### **SCENARIOS AND PERSPECTIVES**

Following the market valuations and the Company's economic advisers, after a long expansionary cycle of consumption, it is noticed that a cycle of economic adjustments is finally just ahead.

The deterioration of certain economic fundamentals should impact both the performance of consumer models (and thus our tenants` retail market), as the financial statements (and liquidity) of tenants. The unemployment rate, the real

income of employed population and the consumer confidence give backspace signal, considering the latest data available for February this year in comparison to the same month of previous years.

Combined with the macroeconomic tendencies, the microeconomic aspect has already showed the oversupply of shopping center developments in certain regions.

The Company has thus the strategy to be located in markets with less competition and to differentiate their businesses, seeking to reduce the negative effects on itself, but also consciously preparing for the challenges and possible opportunities.

#### **CAPITAL MARKET – GOVERNANCE – DIVIDEND POLICY**

Our entry into the capital market in July 2007 allowed us to access better capital sources. This in turn allowed us to conduct an efficient growth strategy.

In addition to access to the capital market, listing on the *Novo Mercado* benefited us with better management practices through the application of corporate governance and equal rights for shareholders.

Our approved dividend policy is to distribute the minimum dividend, required by law, as we consider attractive profitability and necessary reinvestment in the Company.

#### **HUMAN RESOURCES**

We have 262 employees in our offices and shopping centers. Additionally, our shopping centers use outsourced labor for operations such as maintenance, cleaning and security. We monitor the outsourced companies' compliance with employment and social security law.

#### **ENVIRONMENTAL SUSTAINABILITY**

Although shopping center activities generally have low environmental impact, wherever possible we seek to use new concepts in our projects, such as:

- Using electricity from sources certified by the Alternative Source Electrical Power Incentive Program (*Programa de Incentivo às Fontes Alternativas de Energia Elétrica*), or PROINFA.
- Water recycling.
- Recycling waste and oil.
- Optimizing the use of paper and recycling.
- Landscaping with reforestation.
- Architectural design that takes advantage of natural light.

#### INDEPENDENT AUDITING

In compliance with Brazilian Securities Commission (CVM) Instruction 381/03, we report that Grant Thornton Auditores Independentes provided us no services other than auditing our financial statements in the year ended December 31, 2014.

#### **ARBITRATION**

We are obligated to use arbitration at the Market Arbitration Chamber under the arbitration agreement in article 54 of our bylaws.

To:

The Shareholders, Board of Directors and Executive Officers of General Shopping Brasil S.A. São Paulo – SP

We have audited the individual and consolidated financial statements of General Shopping Brasil S.A. (Company), identified as parent company and consolidated, respectively, which comprise the balance sheet as of December 31, 2014 and the respective income statements, the statements of changes in shareholders' equity and statements of cash flows for the period then ended, including the explanatory notes.

#### Management's responsibility for the financial statements

The Management of the Company is responsible for the preparation and fair presentation of the individual financial statements in accordance with accounting practices adopted in Brazil and of the consolidated financial statements in accordance with the International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB), and the accounting practices adopted in Brazil, as well as for such internal control as management determines as necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

#### Responsibility of independent auditors

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Brazilian and International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement in the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal controls relevant to the Company's preparation and fair presentation of the Company's financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal controls. An audit also includes evaluating the appropriateness of accounting practices used and the reasonableness of accounting estimates made by Management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### Opinion on the individual financial statements

In our opinion, the individual financial statements referred to above fairly present, in all material respects, the financial position of General Shopping Brasil S.A. as of December 31, 2014, the performance of its operations and its cash flows for the period then ended, in accordance with the accounting practices adopted in Brazil.

#### Opinion on the consolidated financial statements

In our opinion, the consolidated financial statements referred to above fairly present, in all material respects, the consolidated financial position of General Shopping Brasil S.A. as of December 31, 2014, the consolidated performance of its operations and the consolidated cash flows for the period then ended, in accordance with the international financing reporting standards issued by IASB and with the accounting practices adopted in Brazil.

#### Emphasis of a matter

#### Restatement of corresponding figures

As mentioned in Note 2.28, due to changes in accounting policies involving the accounting of investment properties, the corresponding amounts referring to the period ended December 31, 2013, presented for comparison purposes, were adjusted and are being restated as established in CPC 23 "Accounting policies, changes in estimates and error correction" and CPC 26(R1) "Presentation of the financial statements". Our opinion is not qualified due to this matter.

#### Other matters

#### Statements of Value Added (SVA)

We have also audited the individual and consolidated Statements of Value Added ("SVA") referring to the period ended December 31, 2014, prepared by Company's Management. The presentation of which is required by the Brazilian corporate law for listed companies and as supplementary information under IFRS, which do not require the presentation of the SVA. Such statements were submitted to the same audit procedures described above and, in our opinion, are fairly presented, in all material respects, regarding the financial statements taken as a whole.

# 2. Presentation of financial statements and significant accounting practices adopted

#### 2.1. Preparation basis

#### 2.1.1. Compliance statement

The Company's financial statements comprise:

- the consolidated financial statements prepared in accordance with the international financing reporting standards (IFRS), issued by the International Accounting Standard Board (IASB) and the accounting practices adopted in Brazil, identified as Consolidated BR GAAP and IFRS;
- the individual financial statements of the parent company prepared in accordance with the accounting practices adopted in Brazil, identified as Parent company BR GAAP.

The accounting practices adopted in Brazil comprise the practices included in the Brazilian corporate legislation and the technical pronouncements, guidelines and technical interpretations issued by the Brazilian Financial Accounting Standards Board (CPC) and approved by the Brazilian Securities and Exchange Commission (CMV). The Company adopted all of the standards, standard reviews and interpretations issued by the CPC, IASB and other regulatory bodies that were in effect as of December 31, 2014. Up to December 31, 2013, these accounting practices differed from IFRSs, applicable to separate financial statements only referring to the evaluation of investments in subsidiaries, related companies and jointly-controlled by the equity method, while for the IFRSs, it would be by cost or fair value.

With the issuance of IAS 27 (Separate Financial Statements), reviewed by IASB in 2014, the separate financial statements, in accordance with IFRSs are now allowing the use of the equity method for the evaluation of investments in subsidiaries, related companies and jointly-controlled. In December 31, 2014, CVM issued Deliberation number 733/2014, which approved the Technical Standards Review Document number 07, referring to standards CPC 18, CPC 35 and CPC 37 issued by the Brazilian Accounting Pronouncements Committee (CPC), receiving the mentioned IAS 27 review and allowing its adoption as of the periods ended December 31, 2014. Consequently, the accounting practices adopted in the preparation of the individual financial statements of the parent company on December 31, 2014, are not different from the IFRSs.

Since there are no differences between the consolidated shareholder's equity and the consolidated P&L assignable to the shareholders of the Parent Company, stated in the consolidated financial statements prepared in accordance with the IFRS and the accounting practices adopted in Brazil, and the shareholder's equity and the Parent Company's P&L, stated in the individual financial statements prepared in accordance with the accounting practices adopted in Brazil, the Company chose to present the individual and consolidated financial statements in only one set, side by side.

2.1.2. Functional currency and presentation of the financial statements The financial statements of each subsidiary included in the consolidation are prepared by using their functional currency (the currency of the main financial economic environment in which each subsidiary operates). Upon defining the functional currency of each subsidiary, Management considered which currency has a significant influence in the selling price of the services provided and the currency in which most of the cost of their services provided is paid or incurred. The consolidated financial statements are presented in Reais (RS), which is the Company's functional and presentation currency.

The subsidiaries located abroad (General Shopping Finance and GS Finance II) do not have their own management team nor administrative, financial, and operational independence. Therefore, the Real (RS) was chosen as the functional currency, which is the functional currency of the Company.

#### 2.1.3. Foreign currency

Upon preparing the Company's individual and consolidated financial statements, the transactions in foreign currency are recorded in accordance with the foreign exchange rates in effect on the date of each transaction. At each year-end, the monetary items in foreign currency are converted at the rates in effect. Translation adjustments on monetary items are recognized in the income for the year in which they occur.

#### 2.2. Consolidation basis

The consolidated financial statements include the statements of the Company and its subsidiaries, closed on the same date, and are consistent with the accounting practices described in Note 2.1.

Control is obtained when the Company has the power to control the financial and operating policies of an entity to earn benefits from its activities. In the applicable cases, the existence and the effect of potential voting rights, which are currently exercisable or convertible, are taken into consideration when assessing whether the Company controls, or not, another entity. The subsidiaries are fully consolidated as from the date on which the control is transferred to the Company and they cease to be consolidated, where applicable, as from the date on which the control ceases.

The subsidiaries were fully consolidated including the assets accounts, liabilities accounts, revenues accounts and expenses accounts according to the nature of each account, complemented with the elimination of (a) investment and equity balances; (b) checking account balances and other balances that integrate the assets and/or liabilities held between the consolidated companies; and (c) revenues and expenses, as well as unrealized profits, where applicable, arising from business transactions between the consolidated companies. On December 31, 2014 and 2013, the Company does not have any non-controlling interest to be presented.

The profit or loss of the subsidiaries (including real estate investment funds) acquired or disposed of during the year are included in the income statement as from the date of the effective acquisition or up to the date of the disposal, as applicable. The consolidated financial statements are presented in Brazilian Reais, the Company's functional currency. The Company reviewed the accounting practices adopted by the subsidiaries abroad and did not identify any differences as compared to the practices adopted in Brazil, to be adjusted in the shareholders' equity and in the income for the year of such investments before determining the profit or loss and the equity adjustments.

The consolidated financial statements include the transactions of the Company and of the following subsidiaries, the percentage interest of which, held as of the balance sheet date, is summarized as follows:

#### 2.3. Investments in subsidiaries

The Company's investments in its subsidiaries are evaluated based on the equity method, according to CPC 18 (IAS 28), for the purposes of the Parent company's financial statements.

Based on the equity method, the investment in subsidiaries is accounted for in the balance sheet of the parent company at cost, plus the changes after the acquisition of interest in the subsidiary.

The ownership interest in the subsidiaries is presented in the Company's income statement as equity accounting, representing the net income or loss assignable to the Company's shareholders.

The financial statements of the subsidiaries are prepared in the same reporting period as that of the Company. Where necessary, adjustments are made so that the accounting policies are in accordance with those adopted by the Company.

After applying the equity method of accounting, the Company determines whether it is necessary to recognize impairment on the Company's investment in its subsidiaries. The Company determines at each financial statement closing date whether there is objective evidence that the investment in a subsidiary suffered impairment. If so, the Company calculates the amount of the impairment as the difference between the recoverable amount of the subsidiary and its book value, and then it recognizes the amount in the income statement.

#### 2.4. Presentation of information per segment

The information per operating segment is presented in a manner that is consistent with the internal report provided to the chief operating decision maker. The chief operating decision maker, in charge of allocating resources and assessing the performance of the operating segments, is represented by the CEO.

#### 2.5. Cash and cash equivalents

Cash and cash equivalents include cash, bank deposits, other immediately liquid short-term investments at a known amount of cash and subject to an insignificant risk of having its value changed, which are recorded at cost plus yield earned up to the balance sheet dates, which do not exceed their market or realization value.

#### 2.6. Linked financial investments

The Company has financial investments in Bank Deposit Certificates (CDB) and repo debentures, the yield of which is linked to the changes in the rate of the Interbank Deposit Certificate (CDI). The investments are linked to the commitments undertaken on Real Estate Credit Certificate (CCI) transactions, the lease and sale of assets, and the financial investment balances are stated at cost, plus the yield earned up to the fiscal year closing dates, as described in Note 4.

#### 2.7. Financial instruments

#### **Recognition and Measurement**

Financial assets and liabilities are initially measured at fair value. The costs of the transactions that are directly attributable to the acquisition or issuance of financial assets and liabilities (except for financial assets and liabilities recognized at fair value in P&L) are increased by, or deducted from, the fair value of financial assets or liabilities, where applicable, after initial recognition. The transactions costs that are directly attributable to the acquisition of financial assets and liabilities at fair value through profit or loss are immediately recognized in P&L.

The Company's financial instruments are represented by cash and cash equivalents, accounts receivable, financial investments, linked financial investments, accounts payable, perpetual bonds, loans and financing and derivative financial instruments.

#### Classification

The financial instruments of the Company and its subsidiaries were classified under the following categories:

#### a) Measured at fair value through profit or loss

Financial assets measured at fair value through profit or loss are financial assets held for negotiation, when acquired for that purpose, mainly in the short term. Derivative financial instruments are also classified in this category.

The assets of that category are classified in current assets. The balances referring to gains or losses arising from unsettled transactions are classified in current assets or liabilities and the changes in the fair value are respectively recorded in "Financial income" or "Financial expenses".

#### b) Loans and receivables

Loans and receivables are non-derivative financial instruments with fixed or determinable payments or receipts, which are not listed in stock markets, are classified as current assets, except for those the maturity dates of which exceed 12 months after the date of the preparation of the financial statements, which are classified as noncurrent assets. The Company's loans and receivables correspond to loans made to related parties, trade notes receivable, cash and cash equivalents, linked financial investments, Real Estate Receivables Certificates (CRIs) and other accounts receivable.

#### c) Financial liabilities

Financial liabilities are represented by bank loans and financing and amounts payable of checking accounts with related parties, except for the checking account, the others are stated at original value, plus interest, inflation adjustments and translation adjustments incurred up to the dates of the financial statements. Financial liabilities are initially measured at fair value, net of transaction costs. Later, they are measured at amortized cost using the effective interest rate method, and the financial expenses are recognized based on the effective yield.

#### 2.8. Derivative financial instruments

The Company has derivative financial instruments to manage its exposure to foreign exchange rate and interest rate risks. Note 26 contains further information on derivative financial instruments.

Derivatives are initially recognized at fair value on the date they are entered into and are later remeasured at fair value at the end of the fiscal year. Eventual gains or losses are immediately recognized in P&L.

When a derivative financial instrument is listed in a stock exchange, its fair value must be measured by means of valuations techniques based on stock market quotations, where the price used to calculate the fair value is the one at the closure of each month. For those cases of derivatives not listed, that is, over the counter, the fair value must be calculated by means of valuation methods at present value by discounted future cash flow, also based on market information as of the last day of the month.

#### 2.9. Impairment

Financial assets, except for those at fair value through profit or loss, are evaluated according to impairment indicators at the end of each year. Losses due to impairment are recognized when there is objective evidence of the impairment of the financial assets as a result of one or more events that have occurred after their initial recognition, with an impact on the estimated future cash flows of such assets.

The criteria that the Company and its subsidiaries use to determine whether there is objective evidence of impairment of financial assets include:

- significant financial difficulties of the issuer or debtor;
- agreement breach, such as nonpayment or the late payment of interest or the principal amount;
- a probability of the debtor declaring bankruptcy or financial reorganization;
- the extinguishment of an active market for that financial asset by virtue of financial problems.

The book value of the financial assets is directly reduced due to impairment, except for accounts receivable where the book value is reduced due to the use of a provision. The subsequent recovery of amount previously written off is credited to the provision. Changes in the book value of the provision are recognized in P&L.

#### 2.10. Accounts receivable and related parties

Accounts receivable and related parties are initially recorded at the amounts invoiced on the basis of the lease agreements and of the services provided, adjusted by the effects arising from the recognition of revenue from rents on a straight-line basis calculated in accordance with the terms provided for in the agreements, including, where applicable, yield and inflation adjustment gains.

The allowance for doubtful accounts is created at an amount considered sufficient by Management to cover probable losses in the realization of accounts receivable, considering the following criterion: the individual analysis of debtors, regardless of the maturity dates, as described in Note 5. The expenses with the creation of an allowance for doubtful accounts were recorded in "Other operating expenses" in the income statement.

#### 2.11. Investment properties

Investment properties are represented by land and buildings in shopping malls held for earn yield from rent and/or capital valuation, as disclosed in Note 10.

Investment properties are initially recorded at acquisition or construction cost. After the initial recognition, investment properties are presented at fair value, except for properties under construction ("greenfields"). Gains or losses from fair value variations of investment properties are included in the year's statement of income in the period in which they are generated.

Investment properties under construction ("Greenfields") are recognized by the construction cost up to the moment in which operations start or when the Company is able to measure the fair value of assets reliably.

The costs incurred relating to investment properties under use, such as maintenance, repairs, insurance and property taxes are recognized as costs in the income statement of the year to which they refer.

Investment properties are written off after disposal or when they are permanently withdrawn from use and there are not future economic benefits resulting from disposal. Any gains or losses resulting from the write off of the property (calculated as the difference between net revenues from disposal and the book value of the asset) is recognized in the income for the years in which the property is written off.

For transactions in which the investment is realized under a co-venture regime, in which the amounts paid by the partner to the Company are held in liabilities as advance payments until the effective transfer of the risks and rewards of ownership of the asset (conclusion of building), when the difference between the net amounts from disposal and book value amounts are recognized in P&L.

Financial charges with regard to loans and financing incurred during the construction period, where applicable, are capitalized.

#### 2.12. Property, plant and equipment

These are stated at acquisition cost. Depreciation is calculated on a straight-line basis at the rates described in Note 11, which consider the estimated useful and economic lives of the assets.

Residual values and the useful lives of the assets are annually reviewed and adjusted, if applicable.

A property, plant and equipment item is written off after disposal or when there are not any future economic benefits resulting from the continuous use of the asset. Any gains or losses on the sale or write off of a property, plant and equipment item are determined by the difference between the amounts received on the sale and the book value of the asset and are recognized in P&L.

#### 2.13. Intangible

Intangible assets with definite useful lives, acquired separately, are recorded at cost, minus amortization and accumulated impairment losses. Amortization is recognized according to the straight-line method based on the estimated useful lives of the assets. The estimated useful life and the amortization method are reviewed at the end of each fiscal year and the effect of any changes in the estimates is accounted for prospectively.

#### 2.14. Impairment of tangible and intangible assets

Property, plant and equipment items, investment properties, intangible assets and other noncurrent assets are annually evaluated to identify evidence of impairment or whenever significant events or changes in the circumstances indicate that the book value might be impaired. When there is loss deriving from the situations in which the book value of the asset exceeds its recoverable amount, in this case defined by the value in use of the asset, using the discounted cash flow method, such loss is recognized in the income for the year. As of December 31, 2014 and 2013, there was no evidence that indicated the assets would not be recoverable.

Investments properties are evaluated at fair value, the variations in accordance with the appraisal reports are recorded in the year's income.

#### 2.15. Other assets (current and noncurrent)

An asset is recognized in the balance sheet when it is a resource controlled by the Company deriving from past events and from which it is expected that future economic benefits will inure to the Company. Other current and noncurrent assets are stated at cost or realization value, including, where applicable, the yield and inflation and translation adjustments earned up to the dates the fiscal year as closed.

#### 2.16. Other liabilities (current and noncurrent)

A liability is recognized in the balance sheet when the Company has a legal or constructive obligation resulting from an event in the past and it is probable that an economic resource will be required to settle it. Other current and noncurrent liabilities are stated at known or calculable amounts, plus the corresponding charges and inflation and /or translation adjustments incurred up to the balance sheet date, where applicable.

#### 2.17. Provisions

Provisions are recognized to present liabilities (either legal or presumed) resulting from past events in which it is possible to reliably estimate the amounts and the settlement of which is probable. The amount recognized as a provision is the best estimate of the considerations required to settle a liability at the end of each fiscal year, considering the risks and uncertainties pertaining to the liability.

#### 2.18. Provision for civil, tax, labor and social security risks

A provision for civil, tax, labor and social security risks is created for lawsuits, the future disbursement probabilities of which are considered probable by the legal advisors and Management of the Company and its subsidiaries, considering the nature of the lawsuits and the experience of Management with similar lawsuits, as described in Note 18.

#### 2.19. Cost of loans - capitalization of interest

The financial charges of loans obtained that are directly linked to the acquisition, construction or production of investment properties in progress are capitalized and thus are part of the cost of the asset. The capitalization of such charges starts after the beginning of the preparation of an asset's construction or development activities and is interrupted soon after the beginning of its use or the end of its production or construction.

The costs of loans that are directly attributable to the acquisition, construction or production of qualifiable assets, which necessarily take a substantial period of time to be ready for use or sale, are added to the cost of such assets up to the date in which they are ready for use or sale.

Gains on investments deriving from the temporary investment of resources obtained with specific loans not yet spent with the qualifiable asset are deducted from the costs with loans that are entitled to be capitalized. All of the other costs with loans are recognized in the income for the year in which they are incurred.

#### 2.20. Current and deferred income tax and social contribution

The provision for income tax and social contribution is accounted for the actual and assumed profit regime and was established at the rate of 15%, plus the additional 10% rate on annual taxable income exceeding R\$ 240. Social contribution was calculated at the rate of 9% on the adjusted accounting profit.

As allowed by the tax legislation, certain subsidiaries included in the consolidated financial statements chose to be taxed according to the presumed profit tax regime. The basis of calculation of income tax and social contribution is calculated at the rate of 32% on the gross revenues from services provided, 8% on the fair value adjustment and on sale of investment properties, 100% of financial revenues, on which the regular rate of 15% is applied, plus the additional 10% for income tax and 9% for social contribution.

For that reason, such consolidated companies did not record deferred income tax and social contribution assets on tax losses, negative bases and temporary differences and are not inserted in the context of non-cumulativeness in determining the Tax on Gross Revenues for the Social Integration Program (PIS) and the Tax on Gross Revenues for Social Security Financing (COFINS).

Deferred income tax and social contribution are recognized on the temporary differences arising from the differences between the tax bases of assets and liabilities and their book values in the financial statements. Deferred income tax and social contribution are determined by using enacted, or substantially enacted, tax rates (and tax laws) at the balance sheet date, and must be applied when the respective deferred tax asset is realized or when the deferred tax liability is settled. The rates of these taxes, currently defined for the determination of such deferred credits, are 25% for income tax and 9% for social contribution.

#### 2.21. Revenue recognition

Revenue from rents is recognized according to the straight-line method based on the duration of the agreements, taking into consideration the contractual readjustment and the collection of the 13<sup>th</sup> rent, and the revenue from services provided is recognized when the services are effectively provided.

Our revenues mainly come from the following activities:

#### a) Rent

"Rent" refers to the lease of space to storekeepers and other commercial spaces such as sales stands and includes the lease of commercial spaces for publicity and promotion purposes. The lease of stores to storekeepers in shopping malls corresponds to the largest percentage of the Company's revenues.

#### b) Parking lots

"Parking lots" refers to the revenue from exploiting parking lots.

#### c) Services

"Services" refers to revenue from managing energy and water supplies in the shopping malls.

#### d) Revenues from the transfer of rights to be appropriated

Revenues from the transfer of rights to storekeepers are appropriated to P&L according to the duration of the first lease agreement.

#### 2.22. Investment property intended for sale

Due to the fact that the Company is committed to a sales plan for the disposal of this set of assets and liabilities for immediate sale, such assets and liabilities are held for sale.

Noncurrent assets and liabilities held for sale are recorded in current, separate from other current assets and liabilities, and are evaluated by the lower amount between the book value and the fair value, less sale costs.

#### 2.23. Basic and diluted loss per share

In compliance with Technical Standard CPC 41 (IAS 33), basic profit or loss per share is calculated by taking into account the income for the year and the weighted average of outstanding shares in the respective fiscal year. In the Company's case, the diluted profit or loss per share is equal to the basic profit or loss per share, once the Company does not have any potential dilutive common or preferred stock.

#### 2.24. Statement of value added

The purpose of the statement of value added is to evidence the wealth created by the Company and how it is distributed during certain period of time and is presented by the Company, as required by the Brazilian corporate legislation as part of its individual financial statements and as supplementary information to the consolidated financial statements, for it is not a statement provided for nor compulsory according to the IFRS.

The Statement of Value Added was prepared based on information obtained from the accounting records that serve as the preparation basis of the financial statements.

#### 2.25. Statement of comprehensive income (DRA)

The Company is not presenting the statement of comprehensive income (DRA) due to the fact that there are no other comprehensive income in the years of 2013 and 2014.

#### 2.26. Use of estimates and critical judgment

The preparation of the financial statements according to the accounting practices adopted in Brazil and in conformity with the IFRS require Management to use estimates to record certain transactions that affect the assets, liabilities, revenues and expenses of the Company and of its subsidiaries, as well as the disclosure of information about the data in their financial statements.

The estimates must be determined based on the best existing knowledge, as of the date of approval of the financial statements, concerning ongoing events and transactions and according to the experience of past and/or current events.

The final results of such transactions and information, when they are effectively performed in subsequent periods, may differ from such estimates.

The main assumptions relative to sources of uncertainty in future estimates and other significant sources of uncertainties in estimates as of balance sheet date, involving a significant risk of causing a significant adjustment to the book value of assets and liabilities in the next financial period are discussed below:

#### a) Fair value of investment properties

The Company hired an external and independent appraisal firm that has renowned appropriate professional qualification in the region and in the type of property that is being appraised, to evaluate the Company's investment properties every year.

The fair values are based on the market values of investment properties and the estimated value at which a property could be exchanged on the date of the appraisal between the knowledgeable and interested parties in a transaction at arm's length. This calculation is based on a detailed inspection, including historic analysis, current situations, future perspectives, and location of investment properties appraised outside markets in general.

#### b) Deferred income tax and social contribution

The Company and its subsidiaries, when applicable, recognize deferred assets and liabilities based on the differences between the book value presented in the financial statements and the tax base of the assets and liabilities using the rate in effect.

Deferred tax assets are recognized for all of the tax losses not used in the extent to which the Company has taxable temporary differences (deferred IRPJ and CSLL tax liabilities). Such losses refer to the Company that presents a history of losses that do not prescribe. Accumulated tax loss carryforwards are restricted to the limit of 30% of the taxable income generated in a certain fiscal year.

Deferred income tax and social contribution on equity evaluations of investment properties are calculated according to the assumed profit system.

#### c) Fair value of financial instruments

When the fair value of financial assets and liabilities presented in the balance sheet cannot be obtained on active markets, it is determined by using valuation techniques, including the discounted cash flow method. The data for such methods are based on those practiced on the market, where possible; however, when that is not viable, a certain level of judgment is required to establish the fair value. Such judgment includes considerations about the data used, such as liquidity risk, credit risk and volatility. Changes in the assumptions about such factors could affect the fair value presented in the financial statements.

#### 2.27. Accounting standards - New and adjustments/updates

2.27.1. Changes/new accounting standards which came into effect in 2014 The following accounting standards re in effect since January 01, 2014 and did not affect the Company's financial statements:

- Changes to IFRS 10/CPC 36 (R3), IFRS 12/CPC 45 and IAS 27/CPC 35 (R2) Investment Entities;
- IAS 32/CPC 39 Financial Instruments: Presentation;
- Changes to IAS 36/CPC 01 (R1) Impairment of Assets;
- Changes to IAS 39 Novation of Derivatives and Hedge Accounting Continuity; and

The accounts receivable from clients are stated at the nominal values of the securities that represent the credits, including, where applicable, yields, inflation adjustments earned and effects arising from linearizing the revenue, calculated on a pro rata day basis up to the balance sheet date. Such nominal amounts correspond, approximately, to their respective present values because they are realizable within the short term.

The Company's maximum exposure to credit risk is the book value of the abovementioned accounts receivable. To mitigate such risk, the Company follows the practice of analyzing the types of collection (rents, services and other items), considering the average history of losses, Management periodically monitoring its clients' equity and financial position, establishing credit limits, analyzing credits that have been past due for more than 180 days and permanently monitoring their debit balance, among other practices. The client portfolio that has not been accrued refers to clients whose individual analysis of their financial position did not show that they would not be realizable.

In order to evaluate the quality of the credit of potential clients, the Company considers the following assumptions: the amount of the guarantee offered must cover at least 12 months of occupancy costs (rent, plus common charges and promotion funds, multiplied by 12); the guarantees accepted (properties, letter of guarantee, insurance, etc.); the good standing of the individuals and legal entities involved in the rental (partners, guarantors, debtors) and the use of SERASA¹ as reference for consultations.

#### 8. Related-party transactions

### a) Balances and transactions with related parties

During the course of the Company's business, the controlling shareholders, the subsidiaries and the civil condominiums (jointly-owned properties) enter into financial and commercial transactions among themselves, which include: (i) the provision of consulting services and operating assistance relating to the supply of water and energy and to the electrical installations; (ii) management of shopping malls; (iii) management of shopping mall parking lots; (iv) commercial lease agreements; and (v) agreements and decisions made with respect to condominium rules.

Generally speaking, all of the terms and conditions of the agreements entered into by and between the Company and related parties are in accordance with the terms and conditions that are usually adopted in loan agreements on commutative and market bases, as if the loan occurred with a non-related party, except for the balance of loan agreements on which financial charges are not levied.

Management individually negotiates agreements with related parties, analyzing their terms and conditions in the light of the terms and conditions usually adopted in the market, the particularities of each transaction, including timeframes, amounts, compliance with quality standards, thus having the agreement with the related party reflect the option that best meets the interests of the Company with respect to timeframes, amounts and quality conditions, when compared with other similar providers.

As of December 31, 2014, there is R\$ 859 for the twelve-month period, regarding invoices issued by Lopes Dias Arquitetura company, for providing architecture services.

### **Evaluation at fair value**

The fair value of each investment property under construction was determined by the appraisal performed by a specialist independent firm (CB Richard Ellis).

The methodology adopted to appraise such investment properties at fair value is the one prescribed by The Royal Institution of Chartered Surveyors (R.I.C.S.), in Great Britain, and by the Appraisal Institute in the United States, which are internationally used and well known for appraisal cases and other analyses.

All of the calculations are based on the physical qualification analysis of the property studied and on the several pieces of information obtained in the market, which are properly treated to be used in determining the value of the venture.

For the appraisals, ten-year cash flows were prepared, not considering the inflation that might exist in that period. The average discount rate applied to the cash flow was 10.08% and the average capitalization rate (perpetuity) adopted in the 10th year was 7.48%.

- (a) On June 6, 2007, the Company pledged to pay R\$ 5,589 for the right to use 50.1% of Shopping Light. The aforementioned right has a 42-year term and will be amortized within this time on a straight-line basis. On March 16, 2011, Lumen assigned to Lux 3.15% of the interest held in the right to use Shopping Light, and, on this same date, Lux pledged to pay R\$ 2,480 for the right to use 19.89% of Shopping Light to EMURB. On January 2, 2012, the subsidiary Lumen increased 15% of its interest in Shopping Light, for R\$ 2,092;
- **(b)** On July 30, 2012, the Company pledged to pay to the Municipal Government of Suzano the amount of R\$ 4,505 for property right use with charges of an area totaling 11,925.71 m<sup>2</sup> in the City of Suzano/SP to set up shopping malls. Such right has a 60-year term and is amortized over that period on a straight-line basis;
- (c) By means of an appraisal report, we identified as an intangible asset with definite useful life, arising from the acquisition of 100% of the shares of SB Bonsucesso Administradora de Shopping S.A., the right to renew contracts (contract management), which refers to the automatic renewal of lease contracts of the tenants of Shopping Bonsucesso. The method used was the discounted cash flow method with a 10-year useful life span.

# The movement of the intangible assets for the period ended December 31, 2014 is the following:

#### 18. Provision for civil and labor risks

A provision at an amount considered sufficient to cover probable losses, based on the assessment of external legal advisors, is created for all of the lawsuits that are being contested. The amounts accrued include those referring to tax, labor and civil matters.

There are no judicial deposits linked to such provisions. The provisions are composed as follows:

|           | Consoli    | Consolidated             |  |  |
|-----------|------------|--------------------------|--|--|
|           | 12/31/2014 | 12/31/2013<br>(restated) |  |  |

| Civil (b) | 1,512      | 1,098                    |  |  |
| Total     | 1,787      | 1,543                    |  |  |

- (a) It refers to the lawsuits involving claims for joint and several liability, overtime and the acknowledgment of employment relationships;
- (b) It refers to the lawsuits due to pecuniary injury and pain and suffering damages, lawsuits referring to the renewal of lease agreements, lawsuits regarding collection of amounts owed, and lawsuits concerning contractual rescissions.

As of December 31, 2014, the Company has other pending lawsuits that amount to approximately R\$ 11,714 (R\$ 15,798 on December 31, 2013), the probability of loss of which was rated as possible by the external legal advisors for which no provision has been recorded in the financial statements.

The lawsuits are reassessed from time to time and the provisions are complemented, where necessary. The movement of the provision for risks for the six-month period ended December 31, 2014 is the following:

The Company is authorized to increase its capital stock up to the limit of 65,000,000 registered shares, regardless of reforms to the articles of incorporation, through decision made by the Board of Directors who is also responsible for establishing the conditions for issuing the shares, including the price, timeframe and payment method. The Company may issue common shares, debentures convertible into common shares and subscription bonus within the limit of the authorized capital. Additionally, at the discretion of the Board of Directors, entitlement to preemptive right may be excluded or the period of time for exercising them may be reduced at the issuances of common shares, debentures convertible into common shares, and subscription bonus, the placement of which is made upon the: (a) sale at a stock exchange or by means of public subscription, or (b) stock swaps, in a public offering of the acquisition of control, in compliance with the law and within the limits of the authorized capital. Finally, the Company may, through a decision made by the Board of Directors and in accordance with the plan approved by the Shareholders at a Shareholders' Meeting, grant stock option or share subscription, without shareholders being entitled to preemptive right, on behalf of Management, employees or individuals that provide services to the Company, or the Company's direct or indirect subsidiaries.

### Legal reserve

Legal reserve shall be created in conformity to the Corporate Law and Bylaws, at the basis of 5% of the net profit of each year up to 20% of capital stock. Legal reserve is intended to assure the integrity of the capital stock and can only be used to compensate losses and increase capital. In 2014 and 2013, the Company does not present legal reserve due to not presenting profit.

#### Profit reserve to realize

On December 31, 2014, due to a change in accounting policies regarding measurement of investment properties, the Company withheld the adjustment at fair value payment of investment properties, recorded in the opening balance sheet (January 01, 2013). Consequently, the Company's Management proposed that the amount to be paid of R\$ 958,644 of accumulated profit be retained by the Company to set up the account profit reserve to realize.

# Diluted earnings/ (loss) per share

The Company does not have any debts convertible into shares, neither stock option granted; therefore, it did not calculate the diluted loss per share.

#### 26.1. Risk factors

The main source of revenues of the Company and its subsidiaries are rents from storekeepers in shopping malls.

The Company and its subsidiaries have a risk management policy to manage market risks through financial instruments. The main market risks to which the Company is exposed are translation adjustments and the flotation of inflation indexes inherent to its operations. The policy is monitored by the Board of Directors ensuring that the financial instruments do not exceed the limits of the policy, in consonance with the best corporate governance practices. The primary objective of risk management is to protect the Company's cash flows, where the operations must respect the limits of exposure, coverage, maturity and instrument, thus minimizing operating costs. According to their nature, financial instruments may involve known risks, or unknown risks, so it is important to the Company to assess potential risks according to the Company's and its subsidiaries' judgment. Therefore, there may be risks with guarantees or without guarantees, depending on circumstantial or legal aspects.

The policy allows the Company to use derivative financial instruments only for hedging purposes. The Company is forbidden to enter into any derivatives that result in the net sale of options and structured financial transactions with embedded derivatives.

The main market risk factors that can affect the business of the Company and its subsidiaries are presented below:

#### a) Credit risk

The client portfolio is broadly diversified. By means of internal controls, the Company and its subsidiaries permanently monitor the level of their accounts receivable, which limits the risk of bad debt.

The Company's risk management policy allows transactions where cash funds are invested only with first line counterparties, that is, with low credit risk, according to the international rating agencies. The policy allows derivative financial instrument transactions to be directly entered into at BM&FBOVESPA. Both the financial institutions and the brokers must be previously approved by the Risks Management Committee.

## b) Liquidity risk

The forecast of the cash flow is performed at the operating entities of the Company by financial professionals that continually monitor liquidity in order to ensure that the Company has sufficient cash to meet its operating needs. Such forecast takes into consideration the plans for financing the debt, the achievement of the internal goals of the balance sheet quotient and, if applicable, external or legal regulatory requisites.

The cash and cash equivalents held by the operating entities, in addition to the balance required for managing working capital, is transferred to the treasury, which substantially invests cash and cash equivalents in CDBs, LTNs and investment funds with their yield linked to the changes in the CDI rate and by choosing instruments with appropriate maturity dates or sufficient liquidity to provide the necessary margin, as established by the above-mentioned provisions.

### c) Capital risk

The Company and its subsidiaries manage their capital to make sure that the companies will be able to continue their going concern at the same time that they maximize the return to all of the interested parties or all those involved in their operations by optimizing the balance of the debts and equity.

The capital structure of the Company and of its subsidiaries is formed by net indebtedness (loans and financing and CCIs described in Notes 13 and 14, deducted from cash and cash equivalents and active financial instruments) and by the consolidated shareholders' equity (which includes capital issued and reserves, as presented in Note 19).

Management periodically reviews the capital structure of the Company. As a part of such review, it considers the cost of capital and the risks associated to each class of capital. The indebtedness level as of December 31, 2014 is 136% (100% on December 31, 2013), as follows:

#### Indebtedness level

The indebtedness level as of December 31, 2014 and December 31, 2013 is as follows:

|                           | Consolidated |   |  |  |
|---------------------------|--------------|---|--|--|
|                           | 12/31/2014   | 12/31/2013<br>1,692,075<br>(171,461)<br>1,520,614 |  |  |
| Debt (i)                  | 1,910,213    |   |  |  |

| Net debt                  | 1,732,374    |   |  |  |
| Shareholders' equity (ii) | 1,276,457    | 1,522,796   |  |  |
| Net indebtedness ratio    | 136%         | 100%  |  |  |

- (i) Debt is defined as loans and financing and short and long-term CCIs;
- (ii) Shareholders' equity includes all of the Company's capital and reserves, managed as capital.

## d) Liquidity risk management

The Company and its subsidiaries manage liquidity risk by maintaining appropriate reserves, bank credit lines e credit lines to obtain loans they deem appropriate, by continually monitoring the forecast and actual cash flows, and by combining the maturity profiles of financial assets and liabilities.

### Interest and liquidity risk table

The table below shows the details of the remaining contractual maturity term of the bank liabilities of the Company and its subsidiaries and the contractual amortization periods. The tables have been prepared in accordance with the cash flows not discounted of financial liabilities, based on the closer date on which the Company and its subsidiaries must settle their respective liabilities. The tables include the cash flows of the interest and principal amount. While the interest flows were post-fixed, the amount not discounted was obtained on the basis of the interest curves at the end of the quarter. The contractual maturity is based on the most recent date in which the Company and its subsidiaries must settle their respective liabilities:

(\*) So as to obtain perpetual bonds, the interest to be incurred up to the date of the purchase option and the principal amount were considered and, because they have no maturity dates, they were classified as debt maturing after more than five years.

### e) Interest rate risk

• Loans for working capital and CCIs: the Company's subsidiaries also have a series of loan and financing obtained for working capital, as described in Notes 13 and 14, on which average interest rates are levied of up to 11.53% per year.

The Company entered into a set of interest rate swap transactions with Banco HSBC, intended to protect it from the risk of changes in the TJLP and CDI rates associated to the loans described in Note 13, items "d", "g" and "h", respectively. Such agreements have maturity dates and amortization percentages that are identical to the corresponding loan agreements.

The derivative financial instruments are presented as follows:

| Swap<br>beginning<br>date | Notional<br>value (R\$<br>Thousand) | Swap<br>maturity date | Active index edge | Passive index edge | Swap position as<br>of<br>12/31/2014 |

The Company's derivatives obey the hierarchy of inputs, as described in CPC 40, and are classified as Level 2 in such hierarchy. In other words, they are obtained by means of prices quoted in active markets for similar instruments, prices quoted for identical or similar instruments in non-active markets and evaluation models for which inputs are observable.

### f) Foreign exchange variance risk

The Company, through its subsidiary, has financing and amounts payable to non-related parties entered into in foreign currency in the amount of R\$ 1,082,621 as of December 31, 2014 (R\$ 948,083 as of December 31, 2013).

The Company measures its exposures according to the Company's own forecasting and budgeting model. Through its subsidiary, the Company enters into derivatives, such as NDFs, future market dollar at BMF&Bovespa and over-the-counter swaps, with the purpose of protecting its exposure to exchange variation. The main risk that the Company intends to reduce is the exposure to translation adjustments pegged to its liabilities in foreign currency.

As of December 31, 2014, the Company used derivatives to protect translation adjustment risks equivalent to two years of interest payable, referring to the issue of perpetual bonds.

The Company does not have derivative or non-derivative instrument transactions to hedge the balance of the principal amount of the perpetual bonds. BMF&Bovespa's future dollar derivatives obey the hierarchy of inputs, as described in CPC 40, and are classified as Level 1 in such hierarchy. USD x IGP-M swap obeys the input hierarchy, classified as level 2.

| Instrument         | Notional value | Maturity   | Fair value as of<br>12/31/2014 |
|--------------------|----------------|------------|--------------------------------|
| Swap USD x IGP-M   | 25,000         | 11/09/2015 | 11,356                         |
| Future Dollar BM&F | 61,000         | 02/02/2015 | (3,401)                        |

The Company manages and monitors its derivative position on a daily basis, suiting itself to the best hedge strategy with less costs in relation to others. The financial investments in foreign currency have characteristics that are the opposite of those of liabilities in foreign currency. Therefore, the Company uses natural hedge as a hedging instrument.

In order to operate in BM&Fbovespa, a margin deposit was made, by means of public bonds (LFT). The margin deposit, as of December 31, 2014, was R\$ 20,825.

Financial assets, except for those designated at fair value through profit or loss, are evaluated by impairment indicator at the end of each fiscal year. Impairment losses are recognized when there is objective evidence of a reduction in the recoverable amount of a financial asset, as a result of one or more events that have occurred after their initial recognition, with an impact on the estimated future cash flows of such asset.

The criteria that the Company and its subsidiaries use to determine whether there is objective evidence of impairment of a financial asset include:

- significant financial difficulties of issuer or debtor;
- contract breach, such as nonperformance or late payments of interest or principal amount:
- the probability of the debtor declaring bankruptcy or financial reorganization;
- extinguishment of the active market for that financial asset by virtue of financial problems.

The book value of financial assets is directly reduced by impairment losses for all of the financial assets, except for the accounts receivable, where the book value is reduced by using a provision. Subsequent recoveries of amounts previously written off are credited to the provision. Changes in the book value of the provision are recognized in P&L.

### g) CCI Sensitivity analysis-loans, financing and CCI

Considering the aforementioned financial instruments, the Company developed a sensitivity analysis, as provided for by Instruction No. 475/2008 issued by the CVM, which requires the presentation of two other scenarios with 25% and 50% impairment of the risks variable considered. Those scenarios may generate impacts on the Company's profit or loss and/ or on the future cash flows as described below:

- **base scenario**: maintenance of the levels of interest at the same levels observed as of December 31, 2014;
- adverse scenario: impairment of 25% in the principal risk factor of the financial instrument in relation to the level verified as of December 31, 2014;
- **remote scenario:** impairment of 50% in the principal risk factor of the financial instrument in relation to the level verified as of December 31, 2014.

## h) Loans, financing and CCI

## **Assumptions**

As described above, the Company understands that it is primarily exposed to risks referring to the changes in the TR and IPCA rates, US-dollar translation adjustments, which are the basis for updating a substantial part of the loans, financing and CCIs and perpetual bonds it has entered into. Thus, the table below demonstrates the rates used to calculate the sensitivity analysis:

| Assumptions                            | Base scenario | Adverse<br>scenario | Remote<br>scenario |

The net exposure in US Dollars, without considering the effects of derivative instruments is demonstrated below:

(\*) It is calculated on the net exposure of the Company, without considering the effects of derivative instruments.

The table above shows the effects of interest and changes in the indexes up to the maturity of the contracts.

The interest on the perpetual bonds is fixed. Thus, the sensitivity analysis was not performed.

## i) Cash and cash equivalents

### **Assumptions**

As described above, the Company understands that it is mainly exposed to the changes in the CDI rate and in foreign exchange rates. Thus, the table below demonstrates the indexes and the rates used to calculate the sensitivity analysis:

| Assumptions                | Base scenario         | o Adverse scenario |                     | Remote scenario |

The exchange variation sensitivity analysis of cash and cash equivalents indexed to USD was presented net of other liabilities indexed to the USD, as mentioned in item (i).

## 27. Insurance coverage

The Companies and its subsidiaries take out insurance to cover possible risks on their assets and/or civil liabilities.

As of December 31, 2014, the insurance coverage is as follows:

| Туре                         | Amount insured |
|------------------------------|----------------|
| Civil liability              | 14,100         |
| Comprehensive fire insurance | 2,108,530      |
| Loss of profits insurance    | 589,453        |
| Windstorm / smoke            | 101,714        |
| Shopping mall operations     | 54,706         |
| Pain and suffering           | 17,100         |
| Pecuniary loss               | 484,656        |
| Employer                     | 300            |

The risk assumptions adopted, given their nature, are not part of the audit scope of the financial statements, consequently, they were not audited by our independent auditors.

#### 28. Information per segment

The information per segment is used by the Company's Management for decision making concerning the allocation of resources and performance assessment.

The accounting practices for the reportable segments are the same as those of the Company, described in Note 2. The P&L per segment consider the items that are directly attributable to the segment, as well as those that may be allocated on a reasonable basis. The assets and liabilities per segment are not being presented, once they are not the subject matter of analyses for Management's strategic decision-making.

Therefore, the reportable segments of the Company are the following:

### a) Rent

Rent refers to the lease of space to storekeepers and other commercial spaces such as sales stands, lease of commercial spaces for publicity and promotion, exploitation of parking lots, and fees concerning the transfer of rights to use property spaces.

## b) Services provided

Services provided refer to the revenue from managing the energy and water supply of shopping malls.
